

Rowan Hess

rdh248@cornell.edu | 607-216-7138

Education: Cornell University, Mathematics Major
Budapest Semesters in Mathematics

GPA: 4.2/4.0
Spring 2024, Highest Honors

Experience

Jane Street Quantitative Trading Intern

May 2024-August 2024

Used Python to predict rare corporate actions and bond returns on certain days

Collaboratively used data and knowledge of markets to develop and test trading strategies

Worked with and cleaned data from multiple sources to develop ML models

REU in Math

June 2023-August 2023

Collaborated with others to solve a geometric/combinatorial problem related to voting theory

Communicated and presented project to others

Conducted a review of related mathematical literature

Research in Math

August 2022-June 2023

Determined a good way to reconcile inconsistent probabilities into a consistent space

Found, read, and applied mathematical literature to make progress

Analyzed functions and spaces mathematically

Research in Experimental Physics

January 2022-August 2022

Worked in Python to build signal detection algorithms and analyze data

Used and created mathematical models to match observations

Conceived of, chose, and carried out experiments

Papers

Rowan Hess and Lionel Levine. "How to Quantify the Coherence of a Set of Beliefs." *arXiv*, 3 Dec. 2024, arxiv.org/abs/2412.02777.

Presentations

"How to quantify the coherence of a set of beliefs" presented at JMM 2024

"Manipulating Elections Based on Planar Preference Orders" presented at JMM 2024 with REU group

Awards and Honors

Honorable mention 2024 CRA Outstanding Undergraduate Researcher Award

1st prize 2024 BME Mathematical Contest

1st place 2022 Cornell First Year Math Prize Exam

Dean's List every semester available

2021 Bethe Prize in Physics

Activities & Interests

Big Red Math Competition and Science Olympiad

Wrote tests/problems for high schoolers; volunteered, proctored and graded on competition day

Programming: Proficient in Python, Numpy and Pandas. Experience with Matlab, Java, and Javascript

Interests: Cycling, Speed Cubing, Chess, Programming, Competition Math
